

## Welcome to the freeCodeCamp curriculum

We have thousands of coding lessons to help you improve your skills.

You can earn each certification by completing its 5 final projects.

And yes - all of this is 100% free, thanks to the thousands of campers who donate to our nonprofit.

If you are new to coding, we recommend you [start at the beginning](#).

### ▼ Responsive Web Design Certification (300 hours)

#### ▼ Basic HTML and HTML5

##### Introduction to Basic HTML and HTML5

- ✓ Say Hello to HTML Elements
- ✓ Headline with the h2 Element
- ✓ Inform with the Paragraph Element
- ✓ Fill in the Blank with Placeholder Text
- ✓ Uncomment HTML
- ✓ Comment out HTML
- ✓ Delete HTML Elements
- ✓ Introduction to HTML5 Elements
- ✓ Add Images to Your Website
- ✓ Link to External Pages with Anchor Elements
- ✓ Link to Internal Sections of a Page with Anchor Elements
- ✓ Nest an Anchor Element within a Paragraph
- ✓ Make Dead Links Using the Hash Symbol
- ✓ Turn an Image into a Link
- ✓ Create a Bulleted Unordered List
- ✓ Create an Ordered List
- ✓ Create a Text Field
- ✓ Add Placeholder Text to a Text Field
- ✓ Create a Form Element
- ✓ Add a Submit Button to a Form
- ✓ Use HTML5 to Require a Field
- ✓ Create a Set of Radio Buttons
- ✓ Create a Set of Checkboxes
- ✓ Check Radio Buttons and Checkboxes by Default
- ✓ Nest Many Elements within a Single div Element
- ✓ Declare the Doctype of an HTML Document
- ✓ Define the Head and Body of an HTML Document

#### ▼ Basic CSS

##### Introduction to Basic CSS

- ✓ Change the Color of Text
- ✓ Use CSS Selectors to Style Elements
- ✓ Use a CSS Class to Style an Element
- ✓ Style Multiple Elements with a CSS Class
- ✓ Change the Font Size of an Element
- ✓ Set the Font Family of an Element
- ✓ Import a Google Font
- ✓ Specify How Fonts Should Degrade
- ✓ Size Your Images
- ✓ Add Borders Around Your Elements
- ✓ Add Rounded Corners with border-radius
- ✓ Make Circular Images with a border-radius
- ✓ Give a Background Color to a div Element
- ✓ Set the id of an Element
- ✓ Use an id Attribute to Style an Element
- ✓ Adjust the Padding of an Element
- ✓ Adjust the Margin of an Element
- ✓ Add a Negative Margin to an Element
- ✓ Add Different Padding to Each Side of an Element
- ✓ Add Different Margins to Each Side of an Element
- ✓ Use Clockwise Notation to Specify the Padding of an Element
- ✓ Use Clockwise Notation to Specify the Margin of an Element
- ✓ Use Attribute Selectors to Style Elements
- ✓ Understand Absolute versus Relative Units
- ✓ Style the HTML Body Element
- ✓ Inherit Styles from the Body Element
- ✓ Prioritize One Style Over Another
- ✓ Override Styles in Subsequent CSS
- ✓ Override Class Declarations by Styling ID Attributes
- ✓ Override Class Declarations with Inline Styles
- ✓ Override All Other Styles by using Important
- ✓ Use Hex Code for Specific Colors
- ✓ Use Hex Code to Mix Colors
- ✓ Use Abbreviated Hex Code
- ✓ Use RGB values to Color Elements
- ✓ Use RGB to Mix Colors
- ✓ Use CSS Variables to change several elements at once
- ✓ Create a custom CSS Variable
- ✓ Use a custom CSS Variable
- ✓ Attach a Fallback value to a CSS Variable
- ✓ Improve Compatibility with Browser Fallbacks
- ✓ Cascading CSS variables

- ✔ Change a variable for a specific area
- ✔ Use a media query to change a variable

#### ► Applied Visual Design

---

#### ▼ Applied Accessibility

---

##### Introduction to the Applied Accessibility Challenges

- ✔ Add a Text Alternative to Images for Visually Impaired Accessibility
- ✔ Know When Alt Text Should be Left Blank
- ✔ Use Headings to Show Hierarchical Relationships of Content
- ✔ Jump Straight to the Content Using the main Element
- ✔ Wrap Content in the article Element
- ✔ Make Screen Reader Navigation Easier with the header Landmark
- ✔ Make Screen Reader Navigation Easier with the nav Landmark
- ✔ Make Screen Reader Navigation Easier with the footer Landmark
- ✔ Improve Accessibility of Audio Content with the audio Element
- ✔ Improve Chart Accessibility with the figure Element
- ✔ Improve Form Field Accessibility with the label Element
- ✔ Wrap Radio Buttons in a fieldset Element for Better Accessibility
- ✔ Add an Accessible Date Picker
- ✔ Standardize Times with the HTML5 datetime Attribute
- ✔ Make Elements Only Visible to a Screen Reader by Using Custom CSS
- ✔ Improve Readability with High Contrast Text
- ✔ Avoid Colorblindness Issues by Using Sufficient Contrast
- ✔ Avoid Colorblindness Issues by Carefully Choosing Colors that Convey Information
- ✔ Give Links Meaning by Using Descriptive Link Text
- ✔ Make Links Navigatable with HTML Access Keys
- ✔ Use tabindex to Add Keyboard Focus to an Element
- ✔ Use tabindex to Specify the Order of Keyboard Focus for Several Elements

#### ▼ Responsive Web Design Principles

---

##### Introduction to the Responsive Web Design Challenges

- ✔ Create a Media Query
- ✔ Make an Image Responsive
- ✔ Use a Retina Image for Higher Resolution Displays
- ✔ Make Typography Responsive

#### ▼ CSS Flexbox

---

##### Introduction to the CSS Flexbox Challenges

- ✔ Use display: flex to Position Two Boxes
- ✔ Add Flex Superpowers to the Tweet Embed
- ✔ Use the flex-direction Property to Make a Row
- ✔ Apply the flex-direction Property to Create Rows in the Tweet Embed
- ✔ Use the flex-direction Property to Make a Column
- ✔ Apply the flex-direction Property to Create a Column in the Tweet Embed
- ✔ Align Elements Using the justify-content Property
- ✔ Use the justify-content Property in the Tweet Embed
- ✔ Align Elements Using the align-items Property
- ✔ Use the align-items Property in the Tweet Embed
- ✔ Use the flex-wrap Property to Wrap a Row or Column
- ✔ Use the flex-shrink Property to Shrink Items
- ✔ Use the flex-grow Property to Expand Items
- ✔ Use the flex-basis Property to Set the Initial Size of an Item
- ✔ Use the flex Shorthand Property
- ✔ Use the order Property to Rearrange Items
- ✔ Use the align-self Property

#### ▼ CSS Grid

---

##### Introduction to the CSS Grid Challenges

- ✔ Create Your First CSS Grid
- ✔ Add Columns with grid-template-columns
- ✔ Add Rows with grid-template-rows
- ✔ Use CSS Grid units to Change the Size of Columns and Rows
- ✔ Create a Column Gap Using grid-column-gap
- ✔ Create a Row Gap using grid-row-gap
- ✔ Add Gaps Faster with grid-gap
- ✔ Use grid-column to Control Spacing
- ✔ Use grid-row to Control Spacing
- Align an Item Horizontally using justify-self
- Align an Item Vertically using align-self
- Align All Items Horizontally using justify-items
- Align All Items Vertically using align-items
- Divide the Grid Into an Area Template
- Place Items in Grid Areas Using the grid-area Property
- Use grid-area Without Creating an Areas Template
- Reduce Repetition Using the repeat Function
- Limit Item Size Using the minmax Function
- Create Flexible Layouts Using auto-fill
- Create Flexible Layouts Using auto-fit
- Use Media Queries to Create Responsive Layouts
- Create Grids within Grids

#### ► Responsive Web Design Projects

---

### ▼ Javascript Algorithms And Data Structures Certification (300 hours)

---

## Introduction to JavaScript

- ☒ Comment Your JavaScript Code
- ☒ Declare JavaScript Variables
- ☒ Storing Values with the Assignment Operator
- ☒ Initializing Variables with the Assignment Operator
- ☒ Understanding Uninitialized Variables
- ☒ Understanding Case Sensitivity in Variables
- ☐ Add Two Numbers with JavaScript
- ☐ Subtract One Number from Another with JavaScript
- ☐ Multiply Two Numbers with JavaScript
- ☐ Divide One Number by Another with JavaScript
- ☐ Increment a Number with JavaScript
- ☐ Decrement a Number with JavaScript
- ☐ Create Decimal Numbers with JavaScript
- ☐ Multiply Two Decimals with JavaScript
- ☐ Divide One Decimal by Another with JavaScript
- ☐ Finding a Remainder in JavaScript
- ☐ Compound Assignment With Augmented Addition
- ☐ Compound Assignment With Augmented Subtraction
- ☐ Compound Assignment With Augmented Multiplication
- ☐ Compound Assignment With Augmented Division
- ☐ Declare String Variables
- ☐ Escaping Literal Quotes in Strings
- ☐ Quoting Strings with Single Quotes
- ☐ Escape Sequences in Strings
- ☐ Concatenating Strings with Plus Operator
- ☐ Concatenating Strings with the Plus Equals Operator
- ☐ Constructing Strings with Variables
- ☐ Appending Variables to Strings
- ☐ Find the Length of a String
- ☐ Use Bracket Notation to Find the First Character in a String
- ☐ Understand String Immutability
- ☐ Use Bracket Notation to Find the Nth Character in a String
- ☐ Use Bracket Notation to Find the Last Character in a String
- ☐ Use Bracket Notation to Find the Nth-to-Last Character in a String
- ☐ Word Blanks
- ☐ Store Multiple Values in one Variable using JavaScript Arrays
- ☐ Nest one Array within Another Array
- ☐ Access Array Data with Indexes
- ☐ Modify Array Data With Indexes
- ☐ Access Multi-Dimensional Arrays With Indexes
- ☐ Manipulate Arrays With push()
- ☐ Manipulate Arrays With pop()
- ☐ Manipulate Arrays With shift()
- ☐ Manipulate Arrays With unshift()
- ☐ Shopping List
- ☐ Write Reusable JavaScript with Functions
- ☐ Passing Values to Functions with Arguments
- ☐ Global Scope and Functions
- ☐ Local Scope and Functions
- ☐ Global vs. Local Scope in Functions
- ☐ Return a Value from a Function with Return
- ☐ Understanding Undefined Value returned from a Function
- ☐ Assignment with a Returned Value
- ☐ Stand in Line
- ☐ Understanding Boolean Values
- ☐ Use Conditional Logic with If Statements
- ☐ Comparison with the Equality Operator
- ☐ Comparison with the Strict Equality Operator
- ☐ Practice comparing different values
- ☐ Comparison with the Inequality Operator
- ☐ Comparison with the Strict Inequality Operator
- ☐ Comparison with the Greater Than Operator
- ☐ Comparison with the Greater Than Or Equal To Operator
- ☐ Comparison with the Less Than Operator
- ☐ Comparison with the Less Than Or Equal To Operator
- ☐ Comparisons with the Logical And Operator
- ☐ Comparisons with the Logical Or Operator
- ☐ Introducing Else Statements
- ☐ Introducing Else If Statements
- ☐ Logical Order in If Else Statements
- ☐ Chaining If Else Statements
- ☐ Golf Code
- ☐ Selecting from Many Options with Switch Statements
- ☐ Adding a Default Option in Switch Statements
- ☐ Multiple Identical Options in Switch Statements
- ☐ Replacing If Else Chains with Switch
- ☐ Returning Boolean Values from Functions
- ☐ Return Early Pattern for Functions
- ☐ Counting Cards
- ☐ Build JavaScript Objects
- ☐ Accessing Object Properties with Dot Notation
- ☐ Accessing Object Properties with Bracket Notation
- ☐ Accessing Object Properties with Variables
- ☐ Updating Object Properties
- ☐ Add New Properties to a JavaScript Object

- ☐ Delete Properties from a JavaScript Object
- ☐ Using Objects for Lookups
- ☐ Testing Objects for Properties
- ☐ Manipulating Complex Objects
- ☐ Accessing Nested Objects
- ☐ Accessing Nested Arrays
- ☐ Record Collection
- ☐ Iterate with JavaScript While Loops
- ☐ Iterate with JavaScript For Loops
- ☐ Iterate Odd Numbers With a For Loop
- ☐ Count Backwards With a For Loop
- ☐ Iterate Through an Array with a For Loop
- ☐ Nesting For Loops
- ☐ Iterate with JavaScript Do...While Loops
- ☐ Profile Lookup
- ☐ Generate Random Fractions with JavaScript
- ☐ Generate Random Whole Numbers with JavaScript
- ☐ Generate Random Whole Numbers within a Range
- ☐ Use the parseInt Function
- ☐ Use the parseInt Function with a Radix
- ☐ Use the Conditional (Ternary) Operator
- ☐ Use Multiple Conditional (Ternary) Operators

► ES6

---

► Regular Expressions

---

► Debugging

---

► Basic Data Structures

---

► Basic Algorithm Scripting

---

► Object Oriented Programming

---

► Functional Programming

---

► Intermediate Algorithm Scripting

---

► JavaScript Algorithms and Data Structures Projects

---

► Front End Libraries Certification (300 hours)

---

► Data Visualization Certification (300 hours)

---

► APIs And Microservices Certification (300 hours)

---

► Information Security And Quality Assurance Certification (300 hours)

---

► Coding Interview Prep (Thousands of hours of challenges)
